SUMMARY

Final-year Computer Science student specializing in Data Analytics. Proficient in SQL, Python, and Advanced Excel, with a strong foundation in database management and business intelligence. Successfully delivered end-to-end analysis projects using PostgreSQL and Excel. Currently expanding skillset in Power BI and Full Stack Development.

EDUCATION

Bengal Institute of Technology (A Unit of Techno India Group) Bachelor of Technology (B.Tech) in Computer Science & Engineering Affiliated to MAKAUT, West Bengal Expected Graduation: 2026

- **CGPA:** 6.91
-

SKILLS

TECHNICAL SKILLS

- **Data Analysis:** SQL (Joins, CTEs, Aggregates), Data Cleaning, ETL Processes
 - **Tools:** Microsoft Excel (Pivot Tables, Dashboards), pgAdmin 4, VS Code, Git/GitHub
 - **Languages:** Python, SQL
 - **Currently Learning:** Power BI (DAX, Modeling)
-

PROJECTS

1. Music Store Data Analysis | SQL (PostgreSQL) [[Github Link](#)]

- **Objective:** Analyzed a digital music store database to solve business problems regarding sales trends, customer behavior, and inventory.
- **Key Contribution:** Wrote advanced SQL queries using **Multi-table Joins (5+ tables)**, **CTEs**, and **Window Functions** to identify best-selling artists and top revenue-generating countries.
- **Impact:** Delivered actionable insights on customer demographics (identifying USA and Canada as key markets) and genre popularity to guide marketing strategies.

2. Vrinda Store Sales Analysis | Microsoft Excel [[Github Link](#)]

- **Objective:** Performed annual sales analysis for a retail store to track performance and customer purchasing patterns.
- **Key Contribution:** Cleaned and processed raw sales data in Excel to remove inconsistencies. Created an **interactive dashboard** using Pivot Tables and Slicers to visualize monthly sales vs. orders.
- **Impact:** identified peak sales months and top-performing regions, providing a clear overview of business growth.

ACADEMIC RESEARCH / ONGOING WORK

Traffic Sign Recognition System (System Design Phase)

- **Role:** Lead Researcher & Planner
 - **Conducted extensive feasibility studies and requirement analysis for a CNN-based Traffic Sign Recognition model.**
 - **Authored a detailed Technical Report and Presentation outlining the system architecture, algorithm selection (CNN), and dataset requirements.**
 - **Currently moving into the implementation phase using Python and Deep Learning libraries.**
-

LEADERSHIP & CO-CURRICULAR ACTIVITIES

Assistant General Secretary | College Cultural Fest

- **Leadership:** Spearheaded a team of student volunteers to organize the annual cultural fest, ensuring smooth coordination between 5+ different committees.
- **Event Management:** Managed logistics, scheduling, and participant handling for an event with [approx. number, e.g., 500+] attendees.
- **Teamwork:** Acted as the primary liaison between students and faculty, resolving conflicts and ensuring all deadlines were met efficiently.

Team Lead | Academic Projects

- **Led a group of peers in the "Traffic Sign Recognition" research project, delegating tasks effectively based on individual strengths.**
- **Facilitated regular progress meetings and code reviews to ensure the project stayed on schedule.**
